DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kajiwara, US No. 5,295,341 ("Kajiwara"). In short, Kajiwara discloses a casing (60, 62) comprising first (10) and second sections (11).

1. There is a joint for sealing the sections together (figure 2) to prevent leakage through the casing (60, 62). The joint including a groove (16) in the first section and a tongue (14) extending from the second section to a distal end in the groove (Figure 2).

2. The tongue has a slot (near 26) extending into the distal end for splitting the tongue into first and second forks in frictional engagement with the groove (Figure 2).

3. The forks are compressed together by the groove to narrow the slot from top to bottom to retain the tongue in the groove (Figure 2).

4. The tongue extends from a latterly extending flange surface to present a shoulder on either side of the tongue.

5. The tongue is spaced from the bottom of the groove when the shoulders engage the sealing surface (Figure 2).

Art Unit: 3676

6. The distal ends of the forks on the tongue are tapered inwardly (@24) to facilitate insertion of the tongue into the groove (figure 2).
